Product # Ramen Range

Wok Range
+
Ramen Pot

Allstrong ARE Series – Custom designed for Noodle cooking capacity up to 12 baskets simultaneously.

Descriptions: Allstrong Chinese Wok Range + Ramen Pot System is a dual-function commercial cooking platform designed to maximize burner utilization by enabling rapid conversion between high-BTU wok cooking and large-volume ramen boiling. By installing a precision-fit adapter over the wok burner opening, the station is transformed into a flat support surface that can accommodate ramen pots —without modifying the underlying burner or gas system.

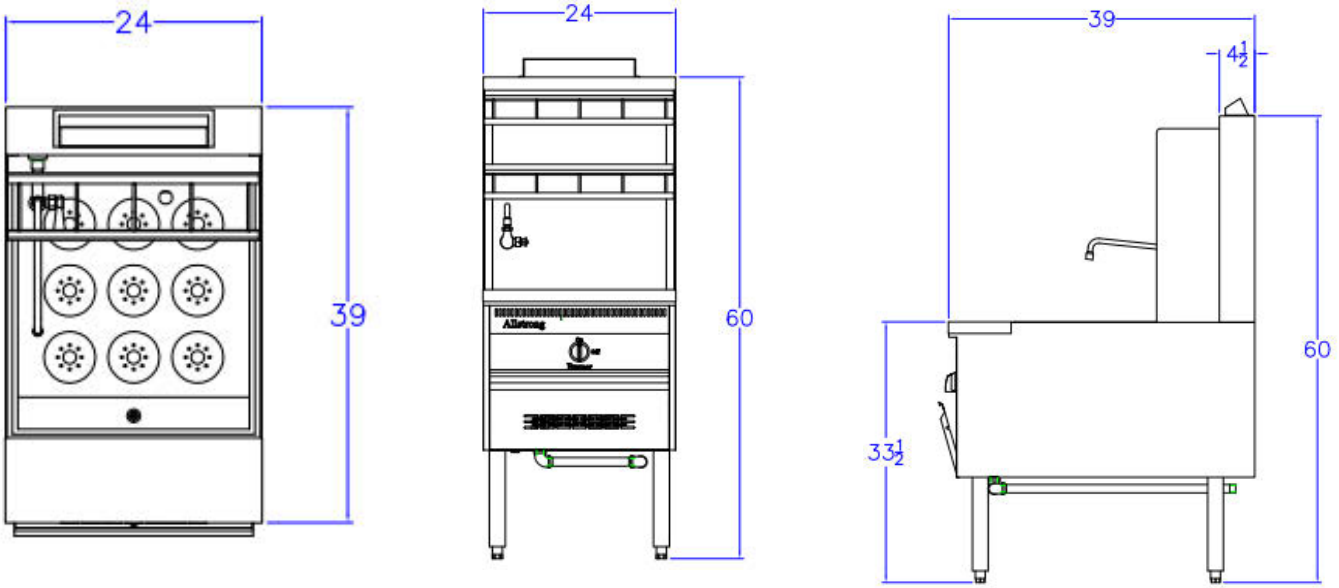

Specifications:

* Single Hole Wok Range with Custom Water Tank.
* Equipped with 6 / 9/ 12 Holes Plate for Noodle cooking baskets.
* Powered by One 23 / 32Tips Jet Burner which has 130,000 / 140,000 BTU/Hr output.
* Water- 1/2" water inlet.
* Gas - 3/4" gas inlet.
* Ignition - Ignition control is located on the lower front panel, including a safety valve (Baso-H15DA-1) w/thermostats. A pilot valve and a gas shut off valve are embedded in the lower front panel for servicing
